Re: Town of Parma, Water Infrastructure Improvement Act Grant Application

Dear Supervisor Roose,

This letter is to express my strong support for the Town of Parma Water Infrastructure Improvement Act (WIIA) grant application through the NYS Environmental Facilities Corporation.

The Town of Parma seeks funding to provide potable water to the residents of Water Improvement Benefit Area 1. Currently, we rely solely on private wells for our water and must contend with poor water quality and quantity, high operation and maintenance costs, and a lack of fire protection. We are in dire need of a reliable supply of potable water. The Town has proposed to extend public water into the area by installing approximately 30,000 linear feet (LF) of 8" water main, valves, hydrants, and appurtenances along various roads in the Town of Parma. The proposed Water District will connect existing water mains along Moul Road, Curtis Road, and Bennett Road. Beyond the installation of a public water system, there are no feasible water supply alternatives for this area. Through this project, the Town will bring much-needed public water to Water Improvement Benefit Area No. 1, improving water quality and protecting public health in our area.

This project is critical to improving water quality, and the Town's application has my full support. Thank you in advance for your time and funding consideration.

Sincerely,

Name(s)
