MISCELLANEOUS

1880 North Union Street Antenna co-location  
Mr. Scibetta stated that after speaking with Chairman Ferguson and reviewing the file in regards to RG&E application for a new tower on this site.

The Board had made it part of its final approval that upon completion of the new tower RG&E was to remove the existing tower that they were replacing. At this time the existing tower has not been removed and the new tower has been constructed. Both Chairman Ferguson and Mr. Scibetta had issues with this.

Chairman Ferguson also stated that he has some concerns with the proposed generator and if the generator will be screened enough to shield the noise.

It was agreed that the Board would like to have the applicants come back in before any decision could be made on the application. Mr. Scibetta was going to contact the applicants have them come back before the Board.

1617 Manitou Road & 4664 Ridge Road West Fill Permit Extension  
Charlie Lissow requested a six (6) month extension to the existing fill permit at this site. Mr. Lissow stated that the extension is needed to keep the DEC permits in place, there has been no filing on site, there has been top soil brought in and then removed (using site as temp storage for top soil), all the SWPPP reports have been completed and are up to date.

Mr. Acker asked if there are any plans to change what is going on at the site in the next six (6) months? Mr. Lissow stated that there was not but they are working with the Town of Greece to get the sewers put in so they can hook up and move forward with the original plans for this site.

Mr. Scibetta stated that there have been not calls or complaints about the site, all fees for the site have been paid and that the SWPPP reports are up to date.

***A motion was made to grant a six (6) month extension for this fill permit. Motion carried unanimously 3-0. (Tod Ferguson absent).***
